

## **Digital Bit Introduces Javelin-Compatible Remote-Controlled Weapon Station**

**PARIS, FRANCE, EUROSATORY, June 14, 2022** - Resilient X11 is a new concept introduced by Digital Bit to incorporate Javelin onto its Remote-Controlled Weapon Station, AGIL®.

The RESILIENT X11 concept combines the Javelin Weapon System, made by Javelin Joint Venture partners Lockheed Martin and Raytheon Missiles & Defense, and AGIL® to create an effective, affordable and integrated mounted solution.

“The AGIL® Remote Controlled Weapon Station is efficient and user-friendly,” says Bogdan Bărbulescu, Managing Director of Digital Bit. “AGIL’s capabilities are encapsulated in an unrivaled price-performance ratio.”

The AGIL® Remote Weapon Station with the Javelin Weapon System is an advanced, low-risk technological solution that provides vehicles with a significant lethality and overmatch capability.

“Mounting the Javelin Weapon System on capable Remote Weapon Stations provides vehicles with significant overmatch capabilities,” says Dave Pantano, Javelin program director. “The Javelin Joint Venture’s work with Digital Bit will expand our vehicle launch capabilities allowing allies additional options to use Javelin’s capabilities in a vehicle-mounted solution in addition to the traditional soldier-fired role.”

Digital Bit partnered with the Javelin Joint Venture to offer this integrated solution to the world stage.

###

### About Digital Bit

Digital Bit is a premier European Defense Company providing world-class defense systems for land, sea, and air applications and applying innovative, modern solutions to the warfighter.

### About Lockheed Martin

Headquartered in Bethesda, Maryland, Lockheed Martin Corporation is a global security and aerospace company that employs approximately 114,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services.
