

**Eurosatory 2022: SMARTSHOOTER unveils another member of the SMASH Family, the SMASH X4 - a Fire Control System with a x4 magnifying optic scope**

**Thousands of additional SMASH systems were recently delivered to the IDF and other customers**

*Eurosatory 2022, Paris – Hall 6 Booth C680*

SMARTSHOOTER, a world-class designer, developer, and manufacturer of innovative fire control systems that significantly increase the accuracy and lethality of small arms, will present the SMASH X4, a Fire Control System with a x4 magnifying optic scope, at the Eurosatory exhibition in Paris.

SMASH X4 combines a x4 magnifying optic scope with SMARTSHOOTER's SMASH unique fire control capabilities, thus providing extended detection, recognition & identification ranges for the shooter as well as extended lethality ranges. The SMASH X4 also includes an etched reticle to allow shooting without battery power. An optional integrated Laser Range Finder (LRF) enables range measurement both as a user-initiated capability as well as a system input for improved precision. Night-capability is also available by using the X4 with thermal night vision devices as a clip-on.

SMARTSHOOTER approves that it has recently completed the delivery of thousands of additional SMASH systems for the IDF and other customers. Deployed and combat-proven, the SMASH family of fire control systems lock on target and ensure precise target elimination of ground, aerial, static or moving targets during day and night operations. Equipped with an onboard computer to perform complex targeting solutions, SMASH enables superior situational awareness and can be operated as a stand-alone solution as well as combined with other systems to provide an effective multi-layer defense solution.

The company will present its range of solutions at Eurosatory, including:

- Handheld operated solutions such as the SMASH X4, SMASH 3000, SMASH 2000 plus and SMASH AD.
- Remotely controlled solutions such as the SMASH Hopper, a Light Remotely Controlled Weapon Station (LRCWS) that can be mounted on different manned and unmanned platforms.
- SMASH Dragon: a lethality payload for small UAVs.

**Michal Mor, SMARTSHOOTER CEO:** "Handheld operated, remotely controlled, robotic or UAV mounted, the SMASH technology provides a multi-applicative capability and enables

the platoon to be smart, precise and connected. The SMASH family of products can be provided separately as stand-alone solutions or in various combinations explicitly tailored to each customer's operational needs and tactical scenarios. By combining advanced augmentation display with connectivity to sensors, C4I systems and other SMASH solutions, the SMASH technology enhances the force's situational awareness and lethality."

### About SMARTSHOOTER

SMARTSHOOTER is a world-class designer, developer, and manufacturer of innovative fire control systems that significantly increase the accuracy and lethality of small arms. With a rich record in designing unique solutions for the warfighter, SMARTSHOOTER technology enhances mission effectiveness through the ability to accurately engage and eliminate ground, aerial, static or moving targets during both day and night operations.

Designed to help military and law enforcement professionals swiftly and accurately neutralize their targets, the company's combat-proven SMASH Family of Fire Control Systems increase assault rifle lethality while keeping friendly forces safe and reducing collateral damage. With a unique technology that makes it possible for every battlefield element to be connected with every other battlefield element, SMASH creates a micro-tactical network that dramatically enhances real-time situational awareness and ensures that the entire platoon shares a common operational picture.

The company's experienced team of engineers combine electro-optics, computer vision technologies, real-time embedded software, ergonomics, and system engineering to provide cost-effective and easy-to-use solutions for modern conflicts.

Fielded and operational, SMARTSHOOTER SMASH family of solutions provides end-users with a "One Shot – One Hit" capability across multiple mission areas, creating a significant advantage for the infantry soldier and ultimately revolutionizing the world of small arms and optics.

SMARTSHOOTER's headquarters are based in Yagur, Israel, and its European subsidiary is located in Düsseldorf, Germany. The company also has an American subsidiary in Maryland and an Australian subsidiary in Canberra.
