

Discover the hidden potential and benefits behind Türkiye's manufacturing capabilities at Eurosatory/ Paris

A new perspective with solid solutions to the global supply crisis is presented by Menatek Defense Technologies to our existing clients and to all industry partners that are undergoing through the same procurement difficulties.

As the largest supply chain manager of Türkiye, Menatek continues restlessly to grow its supplier base. Achieved diversity on projects & services by supplying to 23 countries through the year 2021 and already added 3 more countries to our active market in 2022. The goal is to turn Türkiye into one giant factory by creating a manufacturing & procurement eco-system. The question is how Menatek will manage this complex operation with all the challenges, risks, and difficulties of manufacturing industry. It will be achieved by focusing on quality first and building teams with the right expertise through state of the art digital platform.

Menatek's core capabilities stand out with designing and manufacturing subsystems for tracked and wheeled military purpose vehicles, supporting MRO programs with engineering and operational expertise and creating partnerships with leading domestic partners to support localization efforts. With our uncompromising high-quality standards and cutting-edge quality control & test centre, we are aiming to provide first class services and equipment for our clients to reach their ultimate goals.

Join us at booth number **5A-G658** to experience Türkiye's manufacturing capabilities with Menatek's know-how of engineering services, product variety and quality standards.
